

Abstract

Novel $\beta 10$ polypeptides and heterodimers thereof,
and nucleic acid molecules encoding the same are
5 disclosed. The invention also provides vectors, host
cells, selective binding agents, and methods for
producing $\beta 10$ polypeptides and heterodimeric forms
thereof, specifically $\alpha 2/\beta 10$. Also provided for are
methods for the treatment, diagnosis, amelioration, or
10 prevention of diseases with $\beta 10$ polypeptides and $\alpha 2/\beta 10$
heterodimers or their respective binding agents.
